First create the roles you need , Sales , IT , etc..

Then add the new users to the local db and assign the roles to each user

Then create an enforcement profile with the VLANs you are planning to send to the controller based on the TIPS ROLE condition wheter is Sales or IT

Configuration » Enforcement » Profiles » Edit Enforcement Profile - VLAN10-PROFILE

## Enforcement Profiles - VLAN10-PROFILE

Summary		Profile	Attributes
<b>Profile:</b>			
Name:	VLAN10-PROFILE		
Description:			
Type:	RADIUS		
Action:	Accept		
Device Group List:	-		
<b>Attributes:</b>			
Type	Name		Value
1. Radius:Aruba	Aruba-User-Vlan	=	10

And finally in your policy use the TIPS ROLE condition to send the VLAN assignment

Configuration » Enforcement » Policies » Add

**Enforcement Policies**

**Rules Editor**

Conditions
